

## Frigid Forecast makes good Ice-making weather-

[Long Range Forecast](#) shows sustained colder temperatures all the way to Christmas. Some nights will be Teens, with polar air blowing in and dropping it down into single-Digits this week.

This is music to our beanie covered ears. Local ponds should be ready for Pond Hockey by Christmas, or sooner. Then we hope to get out on the big lake in mid-January, when our Ice Crew will begin work on creating six rinks.

Mother Nature is currently doing her part in making ice. We will need many extra hands to harness that power into what Wally Ice Fest will become on January 28<sup>th</sup>. If you are interested in helping, you can find out more and sign up at our [Volunteer Page](#) .

Thank You
